

Lasers used to precisely remove tumors.

Printed from <https://www.cancerquest.org/newsroom/2010/10/lasers-used-precisely-remove-tumors> on 11/22/2024

Surgeons at the Mayo Clinic have succeeded in using lasers, guided by magnetic resonance imaging (MRI), to remove tumors as large as 2 inches. The laser is used to precisely heat the tumor, killing the cancer and sparing healthy tissue.
