

Androgen Deprivation Therapy May Lead to Decreased Bone Density

Printed from <https://www.cancerquest.org/newsroom/2010/10/adrogen-deprivation-therapy-may-lead-decreased-bone-density> on 06/05/2026

Androgen deprivation therapy is commonly used to treat prostate cancer. A recent study in Australia indicates that this treatment may lead to bone loss in treated men.
