

Brain tumor vaccine to be tested in clinical trial

Printed from <https://www.cancerquest.org/newsroom/2010/12/brain-tumor-vaccine-be-tested-clinical-trial> on 11/22/2024

A new brain cancer vaccine has been developed by researchers at the University of Pittsburgh and at Wake Forest University. The vaccine is targeted at gliomas and will be tested in a small trial to see if it can prevent the recurrence of low-grade gliomas. Because gliomas of this type often recur and become more aggressive, a successful vaccine would save many lives.
