## HPV vaccine, Gardasil®, approved for prevention of anal cancer.

 $Printed \ from \ \underline{https://www.cancerquest.org/newsroom/2010/12/hpv-vaccine-gardasilr-approved-prevention-anal-cancer} \ on \ 11/03/2025$ 

About 90% of anal cancer cases are caused by infection with the human papillomavirus (HPV), the same virus that causes cervical cancer and head/neck cancers. The FDA has approved the use of Gardasil®, a vaccine that prevents infection with HPV, for the prevention of anal cancer. Men and women aged 9-26 are eligible to receive the vaccine.
