Higher insurance co-pays reduce treatment compliance in women with breast cancer

Printed from https://www.cancerquest.org/newsroom/2010/12/higher-insurance-co-pays-reduce-treatment-compliance-women-breast-cancer on 11/14/2026

A study presented at an American Association of Cancer Research (AACR) conference demonstrated that women are less likely to adhere to their treatment if they have higher co-pays. The study examined women taking aromatase inhibitors for breast cancer. They found that if the co-pays were higher, women were more likely to stop taking the medication. This was especially true for elderly women.
