Smoking Increases Risk Of Death For Prostate Cancer Patients

Printed from https://www.cancerquest.org/newsroom/2011/06/smoking-increases-risk-death-prostate-cancer-patients on 11/13/2026

A study of 5366 men diagnosed with prostate cancer between 1986 and 2006 demonstrated that men who smoke are more likely to die from their disease (or cardiovascular disease) than non-smokers or patients who had quit smoking for at least 10 yrs. prior to their diagnosis.
