Smoking Linked to Half Of Bladder Cancer Cases In Women.

Printed from https://www.cancerquest.org/newsroom/2011/08/smoking-linked-half-bladder-cancer-cases-women on 11/15/2026

Smoking has been shown to increase the risk of many forms of cancer in both men and women. A new study looking at a very large group of men and women in the AARP-NIH Diet and Health Study group has found that about 50% of bladder cancers in women are linked to smoking. This result is higher than some previous estimates but is the same percentage as in men.
