Cervical Cancer Curriculum

Printed from https://www.cancerquest.org/multimedia-center/educator-resources/cancer-lesson-plans/cervical-cancer-curriculum on 11/21/2026

Cervical cancer is one of the most frequently diagnosed cancer worldwide. One of the most important ways to reduce the incidence of cervical cancer is through education. Education about cervical cancer can lead to more healthy choices with respect the risk factors related to cervical cancer, especially infection with the human papillomavirus (HPV).

To meet the needs of students and teachers worldwide, we have developed a cervical cancer education unit that is **free** to any interested parties. All materials are copyrighted by Emory University but may be used by anyone working in an educational capacity as long as no fees are charged for the materials.

The Cervical Cancer materials were constructed to meet the Georgia Performance Science Standards as detailed in the lesson plans.

Downloadable Cervical Cancer Curriculum

Overview	**Word Format**	**PDF Format**
Lesson Plan		**PDF Format**
Homework	**Word Format**	**PDF Format**
Questions	**Word Format**	**PDF Format**
Vocabulary	**Word Format**	**PDF Format**
Discussion	**Word Format**	**PDF Format**
PowerPoint Presentation	**PowerPoint Presentation**	

The files are free to download and use in non-profit, educational settings.

To receive a CD with all of the files:
1.Make a tax-deductible contribution of **$8** or more to CancerQuest (to cover shipping and handling costs).
2. Write us to let us know that you would like a disk.

When we receive notification of the donation (typically within one week), we will send out the poster via USPS.

An interview with Dr. Amy Keagy on living with metastatic Breast cancer
