When one has cancer, 'trial' can sound like a scary word. Often, patients avoid trials because they want to take a treatment that has already been approved. The reality is that sometimes, trials offer the best hope for patients. It is very important to look into possible trials when choosing cancer treatments. Importantly, different trials can be offered by doctors located in different institutions in the same area - even right down the street.

Search for [trials offered by the Winship Cancer Institute](#), and [check out their featured trials for lung cancer leukemia, breast cancer, genitourinary cancer and phase 1 trials](#).

Learn about the types of clinical trials and how to find them in your area by visiting the link below.
