

CancerQuestions: Interactive Cancer Biology Quizzes

Printed from <https://www.cancerquest.org/media-center/quizzes> on 10/10/2025

Cancer biology and cancer treatments can be complicated! We have developed CancerQuestions, a multiple choice quizzing feature that allows users to quickly check their knowledge of the material in a section and get immediate feedback on how they did. The quizzes reinforce the information just learned and let users know what material they may need to review before moving on.
