About CancerQuest

Printed from https://www.cancerquest.org/about-us on 11/02/2026

CancerQuest is a cancer education and outreach program of Cellular Journeys.

Cellular Journeys is a nonprofit initiative dedicated to empowering patients, caregivers, and communities with accessible, accurate, and engaging health education. Building on the foundation of **CancerQuest**, Cellular Journeys brings together scientists, educators, students, and storytellers to create resources that demystify cancer biology, highlight advances in research and treatment, and foster informed decision-making.

Through innovative digital media, community engagement, and cross-disciplinary collaborations, we seek to make complex science understandable and relevant. Our goal is to provide people with the knowledge they need to actively participate in their health care and feel supported on their journey.
